Dear Customer:

Congratulations on the purchase of your new HP100 Grand Prix™. As you are already aware, the scene of the equipment world is becoming more high tech, and we at Mytee Products Inc. strive to keep you on the cutting edge with superior quality and technology.

Keep in mind that the HP100 Grand Prix™ is a machine, so neglect or abuse will cause unnecessary damage and void the warranty. However with simple maintenance the HP100 will give quality performance for many years to come.

If warranty questions arise, please consult your user manual or get in touch with your distributor. If you have questions about maintenance, replacing parts or ordering parts, please call an authorized Mytee Products Inc. Service Center. To see an updated list, visit our website at www.mytee.com

Before you begin cleaning, please read your manual thoroughly.

Sincerely,
Mytee Customer Care Dept.

Grounding Instructions

This machine must be grounded. If it should malfunction or breakdown, grounding provides a path of least resistance for electrical shock. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed in accordance with all local code and ordinances. Do not remove ground pin; if missing, replace plug before use.

**DANGER**

Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the machine. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

This appliance is for use on a nominal 120-volt circuit, and has a grounding plug that looks like the plug illustrated in Figure 1 below. A temporary adapter illustrated in Figures 2 and 3 may be used--to connect this plug to a 2-pole receptacle as shown in Figure 2 if a properly grounded outlet is not available. The temporary adapter should be used only until a properly grounded outlet (Figure 1) can be installed by a qualified electrician. The green colored rigid ear, tab or the like extending from the adapter must be connected to a permanent ground such as a properly grounded outlet box cover. Whenever the adapter is used, it must be held in place by a metal screw. Grounding adapters are not approved for use in Canada.

Replace the plug if the grounding pin is damaged or broken.

The Green (or GreenYellow) wire in the cord is the grounding wire. When replacing a plug, this wire must be attached to the grounding pin only.

**DO NOT use extension cords.**

Please Note for America use only

**Parts and Service**

Repairs, when required, should be performed by Mytee service personnel or Mytee authorized Service Center using Mytee original replacement parts and accessories. Call Mytee for repair parts or service. Please specify the Model and Serial Number when discussing your machine.

**Name Plate**

The Model and Serial Number of your machine are shown on the Nameplate on the back panel of the machine. This information is needed when ordering repair parts for the machine. Use the space provided on the front cover to note the Model and Serial Number of your machine for future reference.

Unpacking the Machine

When the machine is delivered, carefully inspect the shipping carton and the machine for damage. If damage is evident, save the shipping carton so that it can be inspected by the carrier that delivered it. Contact the carrier immediately to file a freight damage claim.

**Caution and Warnings**

**Symbols**

Mytee uses the symbols below to signal potentially dangerous conditions. Always read this information carefully and take the necessary steps to protect personnel and property.

- **DANGER**
  - Is used to warn of immediate hazards that will cause severe personal injury or death.

- **WARNING**
  - Is used to call attention to a situation that could cause severe personal injury.

- **CAUTION**
  - Is used to call attention to a situation that could cause minor personal injury or damage to the machine or other property. When using an electrical appliance, basic precautions should always be followed, including the following: Read all instructions before using this machine. This product is intended for commercial use only.

**WARNING**

To reduce the risk of fire, electrical shock, or injury:
1. Read all instructions before using equipment.
2. Use only as described in this manual. Use only manufacturer’s recommended attachments.
3. Always unplug power cord from electrical outlet before attempting any adjustments or repairs.
4. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
5. Do not pull or carry by cord. Do not close a door on cord or pull cord around sharp edges or corners.
6. Do not run appliance over cord. Keep cord away from heated surfaces.
7. Do not use with damaged cord or plug. If cord is damaged, repair immediately.
8. Do not use outdoors or on wet surfaces and or standing water.
9. Always unplug or disconnect the appliance from power supply when not in use.
10. Do not allow to be used as a toy. Close attention is necessary when used by or near children.
11. Do not use in areas where flammable or combustible material may be present.
12. Do not leave the unit exposed to harsh weather elements. Temperatures below freezing may damage components and void warranty.
13. Use only the appropriate handles to move and lift unit. Do not use any other parts of this machine for this purpose.
14. Keep hair, loose clothing, fingers, and all parts of the body away from all openings and moving parts.
15. Use extra care when cleaning on stairs.
16. To reduce the risk of fire or electric shock, do not use this machine with a solid-state speed control device.
17. The voltage and frequency indicated on the name plate must correspond to the wall receptacle supply voltage.
18. When cleaning and servicing the machine, local or national regulations may apply to the safe disposal of liquids which may contain: chemicals, grease, oil, acid, alkalines, or other dangerous liquids.
19. Do not leave operating unattended.

**Filling the Solution Tank**

1. Fill the solution tank with the approved cleaning solution.
2. Do not fill up the solution tank completely. 1” should be left free at the top.
3. Typically, the solution should be a mixture of water and a cleaning chemical appropriate for the type of job.
4. Always follow the dilution instructions on the chemical container label.
5. The temperature of the cleaning solution must not exceed 70°C/160°F.

**CAUTION**

Use only non-flammable liquid in this machine.
Setup
1. Open lid of solution tank. Fill solution with water or approved cleaning agent. For best results, fill with warm water (140°).

WARNING
Flammable materials can cause an explosion or fire. Do not use flammable solutions or materials in tank(s).

FOR SAFETY: When using machine, follow mixing and handling instructions on chemical containers.

ATTENTION: If using powdered cleaning chemicals, mix prior to adding.

2. Attach solution hose (located front of machine). NOTE: Make sure the quick disconnect snap together firmly. As you do this, always inspect hoses for cracks or fraying. Do not use if hoses are damaged.
3. Attach other end of solution hose to wand.
4. Attach vacuum hose to recovery tank.
5. Plug machine’s cord into a grounded wall outlet. FOR SAFETY: Do not operate machine unless cord is properly grounded. FOR SAFETY: Do not operate machine with the use of an extension cord.
6. Turn on pump. Key tool until you have a steady flow.
7. Release tool trigger. Turn on heater.
8. Wait 8–10 minutes for unit to pre-heat.
9. Re-key upholstery tool until hot water begins flowing.
10. Once hot water is flowing, release trigger and pre-heat an additional 4–5 minutes.
11. Turn on vacuum motor.
12. Begin cleaning. Make two dry passes to every wet pass.
13. For floor cleaning, unplug tool and attach floor wand.
14. Work away from cords to avoid damage.
15. Use a deoamer in your recovery tank.
16. To clean heavily soiled areas, repeat cleaning path from different directions.
17. When float shuts off vacuum, empty tanks.
18. When work is complete, unplug cords and hoses.

Pre-Operation
1. Vacuum carpet and upholstery and remove other debris.
2. Perform machine setup procedures.
3. Inspect power cord for damage.

Trouble Shooting

There is no power.
1. Plug machine in proper outlet.
2. Check circuit breaker; reset circuit breaker, other items should not run on the same circuit as machine. Outlet must be a 20-amp circuit.

Pump does not work properly.
1. Snap quick disconnects firmly together.
2. Check solution tank; may be empty.
3. Jets clogged, remove jet and flush clean.
4. Filters clogged, remove filters and rinse clean with water.
5. Heater is blocked; flush out with Mytee’s system maintainer.
6. If brass check valve is stuck replace valve.
7. Check pump wire. May need to reconnect wire.
8. Switch plate switch may need to be replaced.
9. If pump motor brushes are worn, replace pump.

Heater does not work properly.
1. If sensor mounted on the heater has popped, reset sensor by pushing in button.
2. Heating element may need to be replaced.

Vacuum motor does not work properly.
1. Check that hose is tightly connected.
2. Close drain hose valve completely.
3. Secure the vacuum tank tightly.
4. If ball float is shut off, empty vacuum tank of all wastewater.
5. Make sure ball float is firmly installed on the elbow.
6. If water is coming out of vacuum motor, use a low foaming detergent.
7. Clean upholstery tool or floor wand jets.

Accessories (optional)
3601 System Maintainer
8400DX Mytee Dry™ upholstery tool
8390 Wand
8700 Crevice Tool

FAQs
Q: How much does the HP100 weigh and what are the shipping dimensions?
A: 85 Pounds - Box dimensions are 29” x 18” x 36”. Must ship motor freight.

Q: What comes standard with the HP100?
A: The HP100 comes with a hose hanger (H375), four screws, a 25’ 12/3 Cord, 15’ 1-1/4” Vacuum & Internal Solution Hose (8501), a 3” Stainless Steel Upholstery Tool (8400), and a Cuff-Lynx™ reducer (H122).

Q: Does Mytee recommend a tool for the machine?
A: A variety of tools can be used with the unit, including our 8390 wand, 8700 crevice tool,8400 upholstery tool, and 8400DX Mytee Dry™ upholstery tool.

Q: Where do I plug the machine in?
A: The HP100 requires a 20A grounded circuit. Please note: GFI outlets may trip before the breaker setting.

Q: What is the proper pre heat cycle for the HP100?
A: Turn pump switch to the on position and prime pump through the solution hose and the tool. Then turn the heater switch to the on position. Let the machine sit idle for 8-10 minutes. Spray tool until you feel the hot water from the jet. Let machine sit idle for an additional 3-5 minutes. This will insure the water in the heater and hoses will be at the hottest point to start cleaning.

Q: Are the pumps re-buildable for the HP100?
A: Yes, both the seals and the pistons have repair kits available. Please see the pump manual that shipped with your machine for the maintenance schedule.

After Use
1. Unplug.
2. Empty solution tank and rinse it with clean water.
3. Inspect hoses and replace if damaged.
4. Inspect solution filter. Clean or replace if damaged.
5. Store the machine in a clean, dry place.
6. Open recovery tank cover to promote air circulation.
Q: Is there anything I can do to increase the expected life of my machine?
A: Running the vacuum motors with the tank empty and lid off will allow excess moisture in the vacs to dry off. You should also run a System Maintainer through the system to keep the hoses, pump, and heater clean and free of debris.
1. Waist high controls  
2. 2" Male Cuff-Lynx™  
3. Solution tank lid  
4. Female quick disconnect  
5. Single 25’ power cord  
6. Solution tank  
7. Push handle  

8. Easy open lid  
9. Bucket-high drain valve

13. Motor base housing  

ACCESSORIES

- 8400 - 3" Stainless Steel Upholstery Tool
- H122 - Cuff-Lynx™ 1 / 1/4" reducer
- H226 Drain Elbow
- 8501 - Hose-n-Hose™ vacuum & internal solution hose
- H375 - Hose Hanger (2) screws
After the machine has been plugged into a 20 amp grounded outlet, turn on pump. Key tool until upholstery tool releases a steady flow.

HP100 GRAND PRIX™

REPLACING HOSE CUFFS WITH CUFF-LYNX™

Twist clock-wise to remove standard cuffs.

Twist counter clock-wise to attach Cuff-Lynx™ to vac. hose.

Now that you have your Grand Prix™, you will need to replace the cuffs on your vacuum hose. To remove old cuffs, twist clock-wise. To attach reducer Cuff-lynx™ to vacuum hose twist counter clock-wise.

HP100 GRAND PRIX™ VAC/SOL HOSE CONNECTIONS

Attach one end of a solution hose to a wand or other tool, the other end to the Grand Prix™ front quick disconnect. Attach one end of a vacuum hose to the tool, the other end to the Grand Prix™ Cuff-Lynx™ vacuum hose port.

HP100 GRAND PRIX™ FILL SOLUTION TANK

Lift lid to fill. For best results, fill with warm water (140° F).

HP100 GRAND PRIX™ PUMP

After the machine has been plugged into a 20 amp grounded outlet, turn on pump. Key tool until upholstery tool releases a steady flow.
When the float shuts off vacuum, empty tank. Pull lever located at the back of the machine to release water.

Add a defoamer in the recovery tank to reduce foam, prolonging the life of the Grand Prix™ vacuum motor.

Release tool trigger. Turn on heater. Wait 8 – 10 minutes for unit to pre-heat. Once heated, re-key upholstery tool until hot water begins flowing. Once hot water is flowing, release trigger and pre-heat an additional 4 – 5 minutes.

Turn on vacuum motor and begin cleaning. For best results make two dry passes to every wet pass.

When the float shuts off vacuum, empty tank. Pull lever located at the back of the machine to release water.
